

GLOBAL HEALTH ALERT: COVID-19

You may have been exposed to COVID-19 while traveling. Even with no symptoms, you can spread the virus to others.

Protect others from getting sick:

- Keep at least 6 ft/2 m apart from others.

- Wear a mask.

- Wash your hands often.

Watch your health for COVID-19 symptoms.

Take care after travel:

- If fully vaccinated* with a US FDA-authorized vaccine, get tested at 3-5 days.

- If NOT fully vaccinated, get tested at 3-5 days AND stay home for 7 days. If you don't get tested, stay home for 10 days.

*Fully vaccinated means 2 weeks after your final dose.

If you test positive or get sick, isolate yourself from others.

After travel information for people **fully vaccinated** with an FDA-authorized vaccine or a vaccine authorized for emergency use by the World Health Organization:

- Get tested with a [viral test](#) 3-5 days after travel.
 - If your test is positive, [isolate](#) yourself to protect others from getting infected.
- Self-monitor for COVID-19 symptoms; isolate and get tested if you develop

After travel information for **unvaccinated people**:

- [Get tested](#) with a [viral test](#) 3-5 days after travel **AND** stay home and self-quarantine for a full 7 days after travel.
 - Even if you test negative, stay home and self-quarantine for the full 7 days.
 - If your test is positive, [isolate](#) yourself to protect others from getting infected.
- If you don't get tested, stay home and self-quarantine for 10 days after travel.
- Avoid being around people who are at [increased risk for severe illness](#) for 14 days, whether you get tested or not.

Information for people who recently recovered from COVID-19

If you recovered from a documented COVID-19 infection within the last 3 months, follow all requirements and recommendations for fully vaccinated travelers except you do NOT need to get a test 3-5 days after travel unless you symptomatic. People can continue to test positive for up to 3 months after diagnosis and not be infectious to others.

Domestic Travel During COVID-19

Updated Apr. 27, 2021

CORONAVIRUS DISEASE 2019 (COVID-19)

Domestic Travel RECOMMENDATIONS AND REQUIREMENTS	Not Vaccinated	Fully Vaccinated
	Get tested 1-3 days before travel	✓
Get tested 3-5 days after travel and self-quarantine for 7 days. Self-quarantine for 10 days if you don't get tested.	✓	
Self-monitor for symptoms	✓	✓
Wear a mask and take other precautions during travel	✓	✓

Updated Information for Travelers

- Fully vaccinated travelers are less likely to get and spread COVID-19.
- People who are fully vaccinated with an FDA-authorized vaccine or a vaccine authorized for emergency use by the World Health Organization can travel safely within the United States:
 - Fully vaccinated travelers do not need to get tested before or after travel unless their destination requires it
 - Fully vaccinated travelers do not need to self-quarantine
- Fully vaccinated travelers should still follow CDC's recommendations for traveling safely including:
 - Wear a mask over your nose and mouth
 - Stay 6 feet from others and avoid crowds
 - Wash your hands often or use hand sanitizer

CDC recommends delaying travel until you are [fully vaccinated](#), because travel increases your chance of getting and spreading COVID-19. If you are not fully vaccinated and must travel, follow CDC's recommendations for unvaccinated people.

CDC will update these recommendations as more people are vaccinated, as rates of COVID-19 change, and as additional scientific evidence becomes available.

This guidance applies to travel within the United States and U.S. territories.
